Scan QR code to load On-line guide
Or go to:

<https://www.protectparks.net/email-the-minister>

Main points of objection

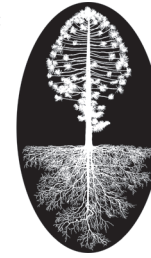

- *Destruction of protected area habitat and aesthetics for commercial exploitation*
- *Creation of two-tier access to public assets according to ability to pay*
- *Abject failure to consult with public upon major changes to assets of high public interest*
- *No public scrutiny of future expansion to scale & type of development or operation*

Campaign Objectives:

- *Stop the development plan for Cooloola National Park*
- *Remove amendments from the Nature Conservation Act that allow commercial infrastructure development in National Parks*

**National Parks are
for Nature,
NOT
commercial development**

National Parks are what they are, BECAUSE they exclude commercial and urban development.

Corporate business and State Govt. want to end this exclusion, and exploit Parks to sell high priced accommodation products.

Allowing this is reckless. It would degrade Parks' capacity to protect nature and serve public needs.

Only 5% of Qld. is National Park. Nature needs them, we need them, without commercial development.

The Queensland Government is acting to create commercial development leases inside **Cooloola National Park** and inside other National Parks across the State.

These private leases are to develop and operate private luxury accommodation.

The sites are located on fragile and significant sites within Cooloola including Double Island Point, Poona Lake, and Upper Noosa River.

10 large, 38sq. mtr. luxury cabins plus extra facilities would be built at DI Point and also at Poona Lake - a pavilion-style resort.

Calling it 'Eco-tourism' is a trick.

The Government refuses to consult properly on this major change to our National Parks. It deals only with select insider groups, excluding all others. It refuses to answer crucial public interest questions.

The secrecy employed in this process would continue for any future expansion.
